

Tune in to savings

We want to help you cut energy costs in your facility. We'll even pay you to do it.

Get a no-cost* high-performance tune-up to identify and correct inefficiencies in your heating and cooling systems. This could lower energy waste and costs in your office or facility. Plus, we'll even give you an instant discount. Hello, savings!

During a tune-up, a qualified participating technician will:

- Measure indoor airflow and correct if needed.
- Inspect filter and change or clean if dirty.
- Clean outdoor condenser coils.
- Inspect indoor coil and clean if dirty.
- Inspect indoor blower and clean if dirty.
- Adjust refrigerant charge to the manufacturer's specifications using a digital refrigerant analyzer.

The process is simple.

1. Your facility's system is evaluated to determine eligibility.
2. The tune-up is completed.
3. An instant discount is applied to your final invoice.

Benefits to you:

- A no-cost* tune-up with an instant discount:

Under 5 tons – \$175	26-30 tons – \$600
5-9 tons – \$200	31-50 tons – \$900
10-14 tons – \$250	51-80 tons – \$1,500
15-19 tons – \$350	Over 80 tons – \$1,800
20-25 tons – \$500	
- A more efficient system
- May help lower cooling costs
- May improve humidity control
- Helps extend equipment life

Who is eligible?

CPS Energy commercial customers, with DX or heat pump systems that are at least a year old and haven't received a tune-up within the last five years, are eligible.

Get started.

To schedule your tune-up or for more information, speak to an energy advisor at **210-353-2SAV (2728)** or cpsenergycommercial@cleareresult.com.

Filter must be provided by or paid for by customer. The technician may not clean if it is already clean, inaccessible, or cleaning would cause damage.

*To maximize the system's efficiency and performance, the customer may be asked to pay for additional refrigerant and other repairs identified by the technician during the service. No cost will be incurred without prior customer approval.
